About Me

I am looking to secure a position in a dynamic and fast-paced organization that utilizes my skills in QA Tester, decision-making and adaptability, and provides opportunities for growth and development.

Summary

- 4 years of experience as Full Stack Developer
- 4 years of experience as Mobile App Developer
- 1 year of experience as Accountant
- Available to work immediately
- Current salary ₦7,000

Job History

Accountant

📄 1 year of experience

Responsibilities:
- Maintained financial records of the organization
- Prepared financial reports and statements on a monthly basis
- Assisted senior accountants with tax filing and audits

Achievements:
- Successfully reconciled several years' worth of financial data for the company, reducing discrepancies and increasing accuracy
- Played a key role in implementing an automated accounting system, resulting in increased efficiency and streamlined processes

QA Tester

📄 Less than 1 year of experience

Responsibilities:
- Performed manual and automated testing of software applications
- Identified and reported software bugs to development team for correction
- Collaborated with cross-functional teams to ensure software quality standards were met

Achievements:
- Developed and implemented a comprehensive testing plan for a new software release, resulting in a 25% reduction in bugs reported after deployment
- Streamlined the software testing process by implementing automation techniques, reducing testing time by 30%

Mobile App Developer

🗐 4 years of experience

Responsibilities:

- Developed and maintained mobile applications for iOS and Android platforms.
- Collaborated with cross-functional teams, including designers and QA engineers, to ensure timely completion of projects.
- Implemented new features and conducted thorough testing to ensure high quality of mobile apps.
- Researched and recommended new technologies and frameworks to improve mobile app development process.

Achievements:

- Successfully launched an iOS and Android app that received a 4.5-star rating on the App Store and Google Play.
- Boosted app performance by 25% by optimizing code and implementing caching mechanisms.

Full Stack Developer

🗐 4 years of experience

Responsibilities:
- Developed and tested software applications for different platforms.
- Designed database schemas and implemented data access layer.
- Collaborated with cross-functional teams to improve application performance and usability.
- Maintained and updated existing applications to meet changing business needs.

Achievements:
- Successfully led the development of a web application for a major client using AngularJS and .NET technologies, resulting in increased customer satisfaction and repeat business.
- Developed an internal tool that streamlined the company's software testing process, reducing testing time by 50% and improving release cycles.

Education / Certificate

Latest Education: **Diploma**
